REPORT ON ANNUAL SURVEY OF INDUSTRIES

2019-20

This report has been prepared on Annual Survey of Industries 2019-20 conducted by Directorate of Economics and Statistics, Odisha. For this, 321 no of sample units have been surveyed in Odisha. Through this report, attempts have been made to throw light on important Characteristics of organized manufacturing sector such as Total no of factories, Fixed capital, Working capital, Total no of Employees, Workers, Man-days generated by employees, Emoluments, Total Input Total Output, Gross Value Added, Depreciation, Net Value Added, Gross Fixed capital formation, Gross Capital formation etc.

FOREWORD

The Annual Survey of Industries (ASI) 2019-20 aims at giving an insight view of performance of registered manufacturing industries in the state as well as serve as a principal source of Industrial Statistics in the State. Through this report, attempts have been made to throw light on various factors pertaining to organized manufacturing sector of Odisha.

The present report ASI 2019-20 focuses on different parameters relating to Capital structure, Employment structure, Emoluments, Total input, Gross output, Gross value added & Net value added etc. by organized manufacturing sector of the state as well as districts. The report also gives a comparative study of different estimates on principal characteristics at the state level between two sets of parameters prepared by DE&S, Odisha and NSO, Govt. of India

I sincerely acknowledge the efforts and contribution made by officers and staff of ASI division of Directorate of Economics & statistics, Odisha in bringing out this report successfully. We hope, this report will be well received by all the stakeholders.

Any suggestion from any quarter for improving the future publication of this report is highly appreciated.

CHAPTER – I

1.1 Introduction:-

Industrial Sector plays a vital role in the rapid and balanced economic development of the country as well as the State. The statistical data on various aspects of this important sector of the economy are the key factor for analyzing the course of development

The Annual Survey of Industries (ASI) is the principal source of industrial statistics. It provides statistical information to assess and evaluate, objectively and realistically, the changes in the growth, composition and structure of organized manufacturing sector comprising of activities related to manufacturing processes, repair services, gas, water supply and cold storage. Viewed in this context, the collection and dissemination of ASI data on a regular basis, are of vital source of information for industrial policy makers, planners and researchers. The Survey is conducted annually under the statutory provisions of the Collection of Statistics (COS) Act 2008, and the Rules framed there-under in 2011.

This report of ASI pertaining to the year 2019-20 is based on the data obtained from National Statistical Office (Industrial Statistics Wing), Government of India and data collected by Directorate of Economics & Statistics. The report presents a comparative study of the estimates of the principal characteristics and its percentage distribution for the state/district levels.

1.2 Objective of the Survey:

The main objective of the Survey:

- I) Estimation of contribution of manufacturing industries as a whole and of each type of industry to the State Income.
- II) Systematic study of the structure of the industry as a whole and of each type of industry.
- III) Occasional analysis of various factors influencing industries in the state.

- IV) Construction of comprehensive, factual and systematic bases for formulation of policy.

1.3 SCOPE AND COVERAGE

Coverage of the Annual Survey of Industries extends to the entire Factory Sector comprising Industrial units registered under the section 2(m) (i) and 2(m) (ii) of the Factories Act, 1948, wherein a "Factory", which is the primary statistical unit of enumeration for the ASI is defined as:-

"Any premises" including the precincts thereof:-

- (i) wherein ten or more workers with power are working or were working on any day of the preceding twelve months, and in any part of which a manufacturing process is being carried on with the aid of power or is ordinarily so carried on, or
- (ii) wherein twenty or more workers without power are working or were working on any day of the preceding twelve months and in any part of which a manufacturing process is being carried on without the aid of power or is ordinarily so carried on but does not include a mine subject to the operation of the Mines Act, 1952 or a railway running shed.

The "manufacturing process" referred to above has been defined (vide section 2(k) in the Factories Act, 1948 as:-

'Any Process for:

- (i) Making, altering, ornamenting, finishing, packing, oiling, washing, cleaning, breaking up, demolishing or otherwise treating or adopting any article or substance with a view to its use, sale, transport, delivery or disposal ; or,
- (ii) Pumping oil, water or sewage; or,
- iii) Generating, transforming or transmitting power; or,

- (iv) Composing types for printing by letter press, lithography, photogravure or other similar process or book binding; or,
- (v) Constructing, reconstructing, repairing, refitting, finishing or breaking up ships or vessels'.
- (vi) Preserving or storing any article in cold storage

The survey also covers bidi and cigar manufacturing establishments registered under the Bidi and Cigar Workers (Conditions of Employment) Act 1966. All electricity undertakings engaged in generation, transmission and distribution of electricity, **not registered with the Central Electricity Authority (CEA)** are also covered under ASI.

However, defence establishments, oil storage and distribution depots, departmental units such as railway workshops, RTC workshops, Govt. Mints, sanitary, water supply, gas storage etc. are excluded from the purview of the survey.

1.4 UNIT OF ENUMERATION

The primary unit of enumeration in the survey is a factory in the case of manufacturing industries, a workshop in the case of repair services, an undertaking or a licensee in the case of electricity, gas and water supply undertakings and an establishment in the case of bidi and cigar industries.

1.5 ASI FRAME

The ASI frame is based on the list of registered factory/units maintained by the Director, Directorate of Factories and Boilers in the state and those maintained by registration authorities in respect of bidi and cigar establishments and electricity undertakings. The frame is being revised and updated periodically by the regional offices of the Field Operations Division of NSO in consultation with the Director, Directorate of Factories and Boilers in the State. At the time of revision, the names of the de-registered factories are removed from the ASI frame and those of the newly registered factories are added. During updation only new registrations are

added to the existing frame. In spite of regular updation of the frame, quite a number of small-sized factories selected for the survey are found to be non-existing in the field and are termed as deleted factories. However, such factories are not taken into consideration for the purpose of tabulation and analysis in this report.

1.6 SCHEDULE OF ENQUIRY

The schedule for ASI 2019-20 is nearly similar with the schedules of Previous years which is designed by N.S.O. (IS wing) Kolkata.

A Facsimile of the Annual Survey of Industries 2019-20 Schedule is given in **Annexure-III**, as the design is same for the last years.

1.7 REFERENCE PERIOD

Reference period for Annual Survey of Industries 2019-20 was the accounting year of the factory, ending on any day during the fiscal year 2019-20. Thus, in A.S.I 2019-20 data collected from respective establishment relate to their accounting year ended on any day between 1st April, 2019 to 31st March, 2020.

1.8 CLASSIFICATION OF INDUSTRIES

Industrial Classification

From 1959 onwards an industrial classification named “Classification of Indian Industries” was adopted. With effect from ASI 1973-74, the National Industrial Classification (NIC) 1970 developed subsequently on the basis of UNISIC 1968(Rev.2) was used and adopted up to ASI 1997-98. The NIC 1998, developed on the basis of UNISIC 1990(Rev.3) was used from ASI 1998-99 to 2003-04. The latest classification i.e. NIC 2004, developed on the basis of UNISIC 2002 (Rev.3.1) has been adopted from ASI 2004-05 to 2007-08. NIC 2008 developed on the basis of UNISIC (Rev 4) is being adopted from ASI 2008-09 onwards.

For Annual Survey of Industries 2019-20, the new series of classification, i.e. NIC-2008 has been introduced. All the factories are classified in their appropriate industry groups on the basis of the value of the principal product manufactured by them. This way a unit gets classified in one and only one industry

group even though it might be manufacturing products belonging to different industries. The estimates for different aggregates presented in this report at three digit level of industry correspond to the NIC-2008. Details of this classification have been shown in **Annexure-IV**.

1.9 SAMPLING DESIGN & SAMPLE ALLOCATION:

A new sampling design has been adopted for ASI 2019-20, all the units in the updated frame are divided into two parts - Central Sample and State Sample. The Central sample consists of two scheme:- Census and Sample. Under Census scheme all the units are surveyed:

1) Census Scheme

- (i) Units having 100 or more employees.
- (ii) All units covered under Joint Returns.
- (iii) After excluding the census scheme units all the units belonging to the Strata (State x sector x 3-digit of NIC-08) having less than or equal to four units are also consider Census scheme. The strata are separately form under three sector considered as **Bidi, Manufacturing and Electricity**.

2) Sample Scheme

All the remaining units in the frame are considered under Sample Scheme.

- (i) For the state, each stratum is formed on the basis of State x District x Sector x 3-digit NIC-2008. The units are arranged in descending order of their total number of employees. Sample are drawn using Circular Systematic Sampling technique for this scheme. An even number of units with a minimum of 4 units are selected and distributed in four sub-samples. It may be noted that in certain cases each of 4 sub-samples from a particular stratum may not have equal number of units.
- (ii) Out of these 4 sub-samples, two pre-assigned sub-samples (1 & 3) are given to NSO (FOD) and the other two-sub samples (2 & 4) are given to State for data collection.

- (iii) All census units plus, all the units belonging to the two sub-samples given to NSO (FOD) are treated as the Central Sample.
- (iv) All Census units plus all the units belonging to the two sub-samples given to State are treated as the State Sample. Hence, State has to use Census Units (collected by NSO (FOD) and processed by NSO (IS Wing) along with their sub- samples while deriving the state level estimates for State based on State Sample.

The methodology adopted for estimation of the characteristics is given in Annexure-II

1.10 PRESENTATION OF DATA:

The estimated results presented in this report are related to reported factories of both Census and sample sector of Annual Survey of Industries of 2019-20. The tables describe several important Industrial characteristics such as changes in Fixed Capital, Working Capital, Invested Capital, Number of Employees, Workers and Emoluments paid to them, Value of output, Value of input and Net Value Added etc. Besides, a comparative analysis has been done in the report to show the trend of Industrial growth in the State and at District level.

The value figures are generally rounded off to Rs. lakh. Hence the total of all industry figures may not tally with the sum of individual industry figures.

1.11 LIMITATION

Also, the results presented in this report are subject to some limitations. Firstly, these are mainly based on the summary block characteristics and do not take into account all the details provided in the inner blocks of the schedule. Secondly, as the figures were rounded up to the nearest integer at various levels of aggregates during the course of tabulation, there might be slight variation in the totals presented at higher level of aggregation and the sums of corresponding constituents shown in different tables.

1.12 COMPARATIVE STUDY BASED ON TWO SETS OF ESTIMATES

A comparative study based on the aggregate of principal characteristics at the state level between the two sets of estimates prepared by Directorate of Economics & Statistics, Odisha and the NSO, Government of India has been presented in Table No.-1. The extent of variation in respect of the important parameters ranges from 1 to 5 percent. Thus the estimates prepared by the D.E.S, Odisha can be considered to be more or less consistent with those thrown up by the N.S.O., New Delhi.

CHAPTER – II

HIGHLIGHTS

2.1: Top Industries during 2019-20

For a few important characteristics, top five Categories of industries at all Odisha level having major percentage shares in the estimated value of overall aggregate are mentioned in the table below.

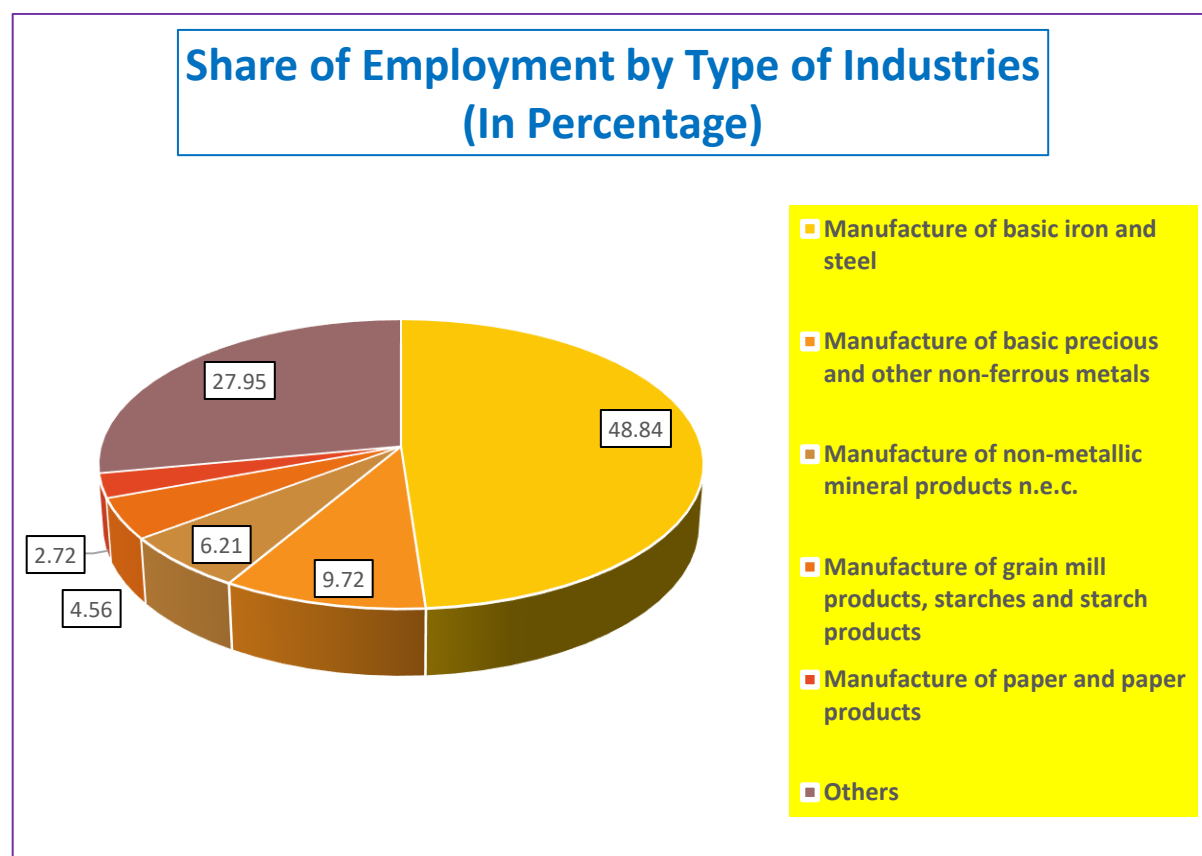

Rank	Characteristic				
	Total no. of factories in operation	Fixed Capital	employment	Output	Gross Value Added (GVA)
(1)	(2)	(3)	(4)	(5)	6
1	Manufacture of grain mill products, starches and starch products (26.41)	Manufacture of basic iron and steel (48.41)	Manufacture of basic iron and steel (48.84)	Manufacture of basic iron and steel (39.52)	Manufacture of basic iron and steel (39.04)
2	Manufacture of non-metallic mineral products n.e.c. (19.10)	Manufacture of basic precious and other non-ferrous metals (22.60)	Manufacture of basic precious and other non-ferrous metals (9.72)	Manufacture of refined petroleum products (21.60)	Manufacture of basic precious and other non-ferrous metals (22.72)
3	Manufacture of basic iron and steel (8.81)	Manufacture of refined petroleum products (12.88)	Manufacture of non-metallic mineral products n.e.c. (6.21)	Manufacture of basic precious and other non-ferrous metals (14.94)	Manufacture of basic chemicals, fertilizer and nitrogen compounds, plastics and synthetic rubber in primary forms (15.39)
4	Manufacture of other food products (7.27)	Electric power generation, transmission and distribution (9.28)	Manufacture of grain mill products, starches and starch products (4.56)	Manufacture of basic chemicals, fertilizer and nitrogen compounds, plastics and synthetic rubber in primary forms (5.20)	Electric power generation, transmission and distribution (5.28)
5	Manufacture of tobacco products (4.56)	Manufacture of basic chemicals, fertilizer and nitrogen compounds, plastics and synthetic rubber in primary forms (2.09)	Manufacture of paper and paper products. (2.72)	Manufacture of wiring and wiring devices. (2.68)	Manufacture of non-metallic mineral products n.e.c. (3.05)
State total	3,067 (100)	3,17,67,653 (100)	2,78,838 (100)	2,74,88,227 (100)	41,78,777 (100)

(* Estimates of Fixed Capital, Output and GVA are in Rs. Lakh)

Note: Figures in parenthesis indicates percentage to total

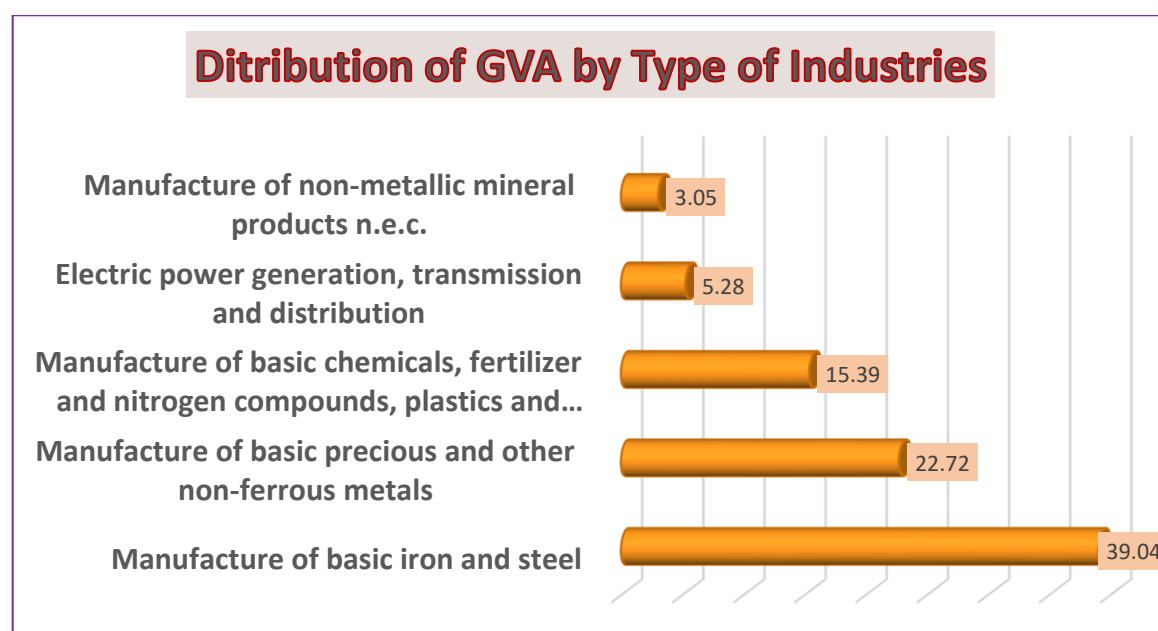

Manufacture of grain mill products, starches and starch products has highest number of factories followed by manufacture of non-metallic mineral products and manufacture of basic iron and steel. Manufacture of basic iron and steel have highest percentage in fixed capital, employment, output and GVA

Figure: 2.1

Highest no of people are employed in basic iron and steel industry followed by manufacture of basic precious and other non-ferrous metals and manufacture of non-metallic mineral products. Around 72% of total employment of the state in manufacturing sector belongs to above top industries.

Figure: 2.2

Among all industries, Basic iron and steel industries contributes to maximum Output and GVA to the manufacturing sector of the state.

Table:-2.2 Top Five districts during 2019-20

Top five districts in terms of their percentage shares in the value of overall aggregates for each of the characteristics are mentioned in the table below.

CONCEPTS AND DEFINITIONS

Important concepts and definitions used in ASI are explained below.

1. A number of accounting, economic and other terms related to the factories are used in conduct of Annual Survey of Industries. For proper assessment and interpretation of ASI data, those are given below.

2. **Accounting Year:** For the purpose of ASI, the accounting year is the period on which the factory closes its books of account. With the enactment of Income Tax Act, by and large, the accounting year of all factories is from 1st April to 31st March.

3. **Reference Period:** It corresponds to the financial year. For example, for ASI 2019- 2020 the reference period is the financial year commencing from 1st April 2019 and ending on 31st March 2020 or the accounting year of the factory ending on any date between 01.04.2019 to 31.03.2020.

4. **Survey Period:** Survey of ASI 2019-20 was conducted in the year 2021 (from 15th June' 2021 to 31st Nov' 2021).

5. **Factory (as per the Factory Act 1948):** Factory is one, which is registered under Sections 2m(i) and 2m(ii) of the Factories Act, 1948. The Sections 2m(i) and 2m(ii) refer to any premises including the precinct thereof (i) wherein ten or more workers are working, or were working on any day of the preceding twelve months, and in any part of which a manufacturing process is being carried on with the aid of power, or is ordinarily so carried on, or (ii) wherein twenty or more workers are working, or were working on any day of the preceding twelve months and in any part of which a manufacturing process is being carried on without the aid of power, or is ordinarily so carried on. Closed factories with fixed assets on site are also considered as registered factories till they are de-registered and removed from the live-register maintained by the Chief Inspector of Factories (CIF) in the State.

6. **Manufacturing Process:** This is as per Section 2(k) of the Factories Act, 1948.

'Any process' for:

- (i) making, altering, ornamenting, finishing, packing, oiling, washing, cleaning, breaking up, demolishing or otherwise treating or adapting any article or substance with a view to its use, sale, transport, delivery or disposal; or,*
- (ii) pumping oil, water or sewage ; or,*
- (iii) generating , transforming or transmitting power; or,*
- (iv) composing types for printing by letter press, lithography, photogravure or other similar process or book binding; or,*
- (v) constructing, reconstructing, repairing, refitting, finishing or breaking up ships or vessels; or,*
- (vi) Preserving or storing any article in cold storage.*

7. **Gross Value of Plant and Machinery:** Gross value of plant and machinery represents the total original (un-depreciated) value of installed plant and machinery as at the end of the accounting year. It includes the book value of own constructed plant and machinery, if installed,

and the approximate value of rented-in plant and machinery as at the time of renting in but excludes the value of rented-out plant and machinery. Total value of all the plant and machinery acquired on hire-purchase basis is also included. Thus it represents the gross value of plant and machinery engaged in production process.

8. **Fixed Capital:** Fixed Capital represents the depreciated value of fixed assets owned by the factory as on the closing day of the accounting year. Fixed assets are those, which have normal productive life of more than one year. Fixed capital covers all type of assets, new or used or own constructed, deployed for productions, transportation, living or recreational facilities, hospitals, schools, etc. for factory personnel. It would include land, building, plant and machinery,

transport equipment etc. It includes the fixed assets of the head office allocable to the factory and also the full value of assets taken on hire-purchase basis (Whether fully paid or not) excluding interest element. It excludes intangible assets and assets solely used for post-manufacturing activities such as, sale, storage, distribution, etc.

9. **Depreciation:** Depreciation is consumption of fixed capital by the factory due to wear and tear and obsolescence during the accounting year and is taken as provided by the factory owner, or if not provided by the factory this is estimated on the basis of cost of installation and working life of the fixed assets.

10. **Finished Goods:** Finished Goods are those, which are manufactured by the factory for sale. Finished goods should conform to a prescribed standard.

11. **Physical Working Capital:** This is defined to include all physical inventories owned, held or controlled by the factory as on the closing day of the accounting year such as the materials, fuels and lubricants, stores, etc. that enter into products manufactured by the factory itself or supplied by the factory to others for processing. Physical working capital also includes the value of stock of materials, fuels and stores etc. purchased expressly for re-sale, semi-finished goods and goods-in-process on account of others and goods made by the factory which are ready for sale at the end of the accounting year. However, it does not include the stock of the materials, fuels, stores, etc. supplied by others to the factory for processing. Finished goods processed by others from raw materials supplied by the factory and held by them are included and finished goods processed by the factory from raw materials supplied by others, are excluded.

12. **Working Capital:** Working Capital is the sum total of the physical working capital as already defined above and the cash deposits in hand and at bank, land, the net balance of amounts receivable over amounts payable at the end of the accounting year. Amounts receivable include value of credit items on revenue account, such as sums due to the factory for goods sold, amounts

advanced in connection with normal factory work, bills of exchange payable to the factory, payments made in advance such as for fire insurance, telephone charges, rates and taxes, call deposits and security deposits having a normal life of less than one year, etc. It excludes unused overdraft facility, fixed deposits irrespective of duration, advances for acquisition of fixed assets, long-term loans including interest thereon and investment.

13. **Invested Capital:** Invested capital is the total of fixed capital and physical working capital.

14. **Productive Capital:** This is the total of fixed capital and working capital.

15. **Outstanding Loans:** Outstanding loans represent all long-term loans, whether interest bearing or not, outstanding according to the books of the factory as on the closing day of accounting year.

16. **Contract Worker:** All persons who are not employed directly by an employer but through the third agency, i.e. contractor, are termed as contract workers.

17. **Employees:** Employees relate to all persons engaged by the factory whether for wages or not, in work connected directly or indirectly with the manufacturing process and include all administrative, technical and clerical staff as also labour in production of capital assets for factory's own use. This is inclusive of persons holding position of supervision or management or engaged in administrative office, store-keeping section and welfare section, watch and ward staff, sales department as also those engaged in the purchase of raw materials etc. and production of fixed assets for the factory. It also includes all working proprietors and their family members who are actively engaged in the work of the factory even without any pay and the unpaid members of the co-operative societies who work in or for the factory in any direct and productive capacity. Persons in the head office connected with the manufacturing activity of the factory are also included in this item.

18. **Labour Turnover:** Labour turnover measures the extent of change in the working force due to accession and separation during a given period. The term 'accession' was defined as the total number of workers added to employment during the period, whether new or re-employed or transferred from other establishments or units under the same management. Inter-departmental transfers within the same establishment are, however ignored. The term 'separation' implies termination of employment at the instance of worker or employers. It includes termination of services due to death or retirement. As in the case of accession, transfers to other establishments are included but transfers within the same establishment are ignored. Retrenchment as a result of rationalization or modernization or any other cause, is also treated as separation.

19. **Wages:** Wages are defined to include all remuneration capable of being expressed in monetary terms and also paid more or less regularly in each pay period to workers as compensation for work done during the accounting year. It **includes:**

- (i) Direct wages and salary (i.e. basic wages/salaries), payment of overtime, dearness, compensatory, house rent and other allowances;
- (ii) Remuneration for period not worked (i.e. basic wages), salaries and allowances payable for leave period, paid holidays, lay-off payments and compensation for unemployment (if not paid from source other than employers);
- (iii) Bonus and ex-gratia payment paid more or less regularly (i.e., incentive bonuses and good attendance bonuses, production bonuses etc.).

It **excludes** layoff payments and compensation for employment except where such payments are for this purpose, i.e., payments not made by the employer. It **excludes** employer's contribution to old age benefits and other social security charges, direct expenditure on maternity benefits and crèches and other group

benefit in kind and travelling and other expenditure incurred for business purposes and reimbursed by the employer. The wages are expressed in terms of gross value, i.e., before deductions for fines, damages, taxes, provident fund, employee's state insurance contribution etc. Benefits in kind (perquisites) of individual nature are only **included**.

20. **Bonus:** Profit sharing bonus, festival bonus, year-end bonus, and all other bonuses and ex-gratia payments paid at less frequent intervals are covered by this term.

21. **Workmen and Staff Welfare Expenses:** These include expenditure incurred by the employer on the maternity benefits and crèches and other benefits such as supply of food, beverages, tobacco, clothing and group lodging at concessional rates and educational, cultural and recreational facilities and services and grants to trade unions and cooperative stores meant for employees. All group benefits are included.

22. **Emoluments:** These are defined in the same way as wages but paid to all employees plus imputed value of benefits in kind i.e. the net cost to the employers on those goods and services provided to employees free of charge or at markedly reduced cost which are clearly and primarily of benefit to the employees as consumers. It includes profit sharing, festival and other bonuses and ex-gratia payments paid at less frequent intervals (i.e. other than bonus paid more or less regularly for each period). Benefits in kind include supplies or services rendered such as housing, medical, education and recreation facilities. Personal insurance, income tax, house rent allowance, conveyance etc. for payment by the factory also is included in the emoluments.

23. **Supplements to Emoluments:** These include: (i) employer's contribution to old age benefits, i.e., provident fund, pension, gratuity, etc.; (ii) employer's contribution towards other social security charges such as Employees' State Insurance, compensation for work injuries, occupational diseases, maternity benefits, retrenchment and lay-off benefits etc.; and (iii) group benefits like direct

expenditure on maternity, crèches, canteen facilities, educational, cultural and recreational facilities and grant to trade unions, co-operative stores etc. meant for employees.

24. **Compensation of Employees:** Compensation of employees is the total of emoluments and supplement to emoluments.

25. **Man-days Worked:** These are obtained by summing up the number of man-days worked by persons working in each shift over all the shifts on all days, i.e. both manufacturing and non-manufacturing days. This figure excludes persons who are paid but remain on leave, strike, etc.

26. **Man-days Paid For:** The number of man-days paid for is arrived at by summing up the number of employees paid for in each shift. This also includes man-days on weekly schedule holidays if paid for and those absences with pay as also man-days lost through lay off/ strike for which compensation was payable.

27. **Working Day:** Working day means the days on which a manufacturing process and/ or repair or maintenance work was carried on.

28. **Non-working Day:** Apart from manufacturing day and repair and maintenance days there may be some non-working days. Non working days are those days on which the workers give their attendance but due to non-availability of raw materials power etc. no effective work is done. As the workers are paid for these days such days are also taken into account for the purpose of labour statistics.

29. **Basic Materials:** Basic materials are the materials which are important and of key nature to the industry, on which the manufacturing process is based, viz. metal for machine, leather for shoe. Such material is not lost through the process of production but only changes its forms.

30. **Consumable Stores:** All such materials which assist the manufacturing process and lose their identity without entering the products are called consumable stores, e.g., cotton waste.

31. **Fuel Consumed:** Fuel Consumed represent total purchase value of all items of fuels, lubricants, electricity, water (purchased to make steam) etc. consumed by the factory during the accounting year except those which directly enter into products as materials consumed. It excludes that part of fuels, which is produced and consumed by the factory in manufacture i.e., all intermediate products and also fuels consumed by employees as part of amenities. It includes quantities acquired and consumed from allied concerns, their book value being taken as their purchase value and also the quantities consumed in production of machinery or other capital items for factory's own use.

32. **Materials Consumed:** Materials consumed represent the total delivered value of all items of raw materials, components, chemicals, packing materials and stores which actually entered into the production process of the factory during the accounting year. Components and accessories fitted as purchased with the finished product during the accounting year are also to be included. It excludes intermediate products. Intermediate products in the above context mean all those products which are produced by the factory and consumed for further manufacturing process.

33. **Total Input:** This comprises gross value of fuel materials etc. consumed (as defined above) and also other inputs viz. (a) cost of non-industrial services received from others (b) cost of materials consumed for repair and maintenance of factory's fixed assets including cost of work done by others to the factory's fixed assets (c) cost of contract and commission work done by others on materials supplied by the factory (d) cost of office supplies and products reported for sale during last year & used for further manufacture during the accounting year.

34. **Intermediate Product:** Intermediate Product is a product which is obtained and consumed during a manufacturing process, which may or may not be saleable and is not the intended final product.

35. **Net Value of Semi-Finished Goods:** It represents the excess/deficit of value of semi- finished goods and/or goods-in-process at the end of the accounting year over that at the beginning of year.

36. **Products:** These are defined to include the ex-factory value (i.e. exclusive of taxes, duties etc. on sale and inclusive of subsidies etc., if any) of all products and by-products, excluding intermediate products, that have been completed during the accounting year for sale whether actually sold during the accounting year or entered into inventory. Also include fixed assets produced by the factory for its own use.

37. **Gross Output:** Gross output is defined to include the ex-factory value, (i.e., exclusive of taxes, duties, etc. on sale and inclusive of subsidies etc., if any) of products and by-products manufactured during the accounting year, and the net value of the semi-finished goods, value of own construction and also the receipts for industrial and non-industrial services rendered to others, rent received for building, plant & machinery and other fixed assets, net balance of goods sold in the same condition as purchased, value of electricity generated and sold and an amount equal to expenses on research & development (R&D). Value of gross output and total output has been used in the text inter-changeably to mean the same thing.

38. **Industrial Services:** Any services taken or rendered from one to another unit resulting in increase in the value of material during the manufacturing process are industrial services.

39. **Non-Industrial Services:** All such services which do not have a direct bearing on the manufacturing process but are needed by any manufacturing unit are called non-industrial services, say, transport services.

40. **Net Value Added:** This is obtained by deducting the value of total input and depreciation from gross output.

Estimation Procedure

Notations:

i = subscript for i-th state.

s = subscript for s-th stratum in the i-th state.

m = subscript for sub-sample (m = 1, 2, 3, 4) [m=1 and 3 for central and 2 and 4 for state].

k = subscript for k-th sample enterprise under a particular stratum.

E = total number of factory **in the sample sector** in a stratum.

e = number of factories surveyed out of total number of factory **in the sample sector** in a stratum.

x, y = observed value of characteristics x, y under estimation.

\hat{X} , \hat{Y} = estimate of population total X, Y for the characteristics x, y.

Under the above symbols,

Y_{ismk} = observed value of the characteristic y for the k-th enterprise belonging to the m-th subsample for the s-th stratum in the i-th state.

Formulae for estimation of aggregates for a state based on pooled sample:

Estimation formula for any characteristic of the unit **for the sample sector** of the i-th state **based on pooled sample (i.e., central and state combined)** will be as follows:

Let sub-sample estimate of a characteristic Y for m-th sub-sample in s-th stratum in i-th State

is ${}^s\hat{Y}'_{ism}$ Then

$${}^s\hat{Y}'_{ism} = \frac{E_{is}}{e_{ism}} \sum_{k=1}^{e_{ism}} y_{ismk}, m=1,2,3,4,\dots\dots\dots$$

The stratum level estimate for the pooled sample will be the simple average of the sub-sample estimate of Y in that stratum. Mathematically, if \hat{Y}'_{is} be the stratum-level estimate for s-th stratum for i-th State, then

$$\text{Pooled } \hat{Y}'_{is} = \frac{1}{t} \sum_{m=1} {}^s\hat{Y}'_{ism}, \quad \text{where } t (\leq 4) \text{ is the number of non-void sub-sub-sample available with the stratum } s.$$

Thus, the estimator for any characteristic Y of the unit **the sample sector** of the i-th state based on **pooled sample** is:

$$Pooled \hat{Y}_i' = \sum_s Pooled \hat{Y}_{is}' \dots\dots$$

Using ${}^c\hat{Y}_i''$ as the corresponding estimate for that characteristic of the unit **for the census sector** of the i-th state, then the estimate for that characteristic of the enterprise for the i-th state **as a whole** based on the pooled sample is given by:

$$Pooled \hat{Y}_i = Pooled \hat{Y}_i' + {}^c\hat{Y}_i'' \dots\dots\dots$$

The above equations are given for generating the estimates for the State. However, similar treatment may be given or same equations may be used in generating the estimates at district level.
